However, when high mist levels are generated or where machines are close together or ventilation is inadequate, operators may experience respiratory irritation. For such applications, use of splash guards or mist collectors is recommended.

Personal protective equipment

Eye protection Proper metalworking plant eye protection required when handling product concentrate.

Other protective clothing or equipment Use effective metalworking plant protective clothing as appropriate.

Respiratory protection Product is not volatile. In case of insufficient ventilation wear suitable respiratory equipment.

Work / Hygiene Practices Good personal hygiene should always be followed.

Protective Gloves Impervious gloves, such as nitrile gloves, are recommended when handling product concentrate.

Medical Conditions generally aggravated by exposure

May aggravate existing skin irritation where further defatting or skin penetration could occur.

Skin irritation (redness and dryness of hands) may be experienced when the diluted product has been contaminated by certain oils, by dissolved metals, or when mix ratio is too strong. When problems occur, use of water-resistant barrier creams may be a temporary control measure. Contact Milacron Marketing Company LLC Technical Services at 1-513-458-8199 for specific recommendations.

When used in applications generating high levels of mist, operator exposure can be minimized by proper ventilation, use of mist collectors or splash guards, as appropriate. If there is doubt about actual mist levels present, monitoring should be conducted. Contact Milacron Marketing Company LLC at 1-513-458-8199 for specific recommendations.
